Belltech
Business Cards Designer Pro

Feature List

Belltech Business Cards Designer Pro is a classic professional quality business card designing and printing software. It helps you create amazing business cards in a matter of minutes and print them right-away on any Windows compatible printer.

Basic Features

- **Design Business Cards**: Design and print professional quality business cards with text, shapes, graphics and background images.
- **Use templates and graphics**: Use from the supplied card templates, background and clip-arts to start the layout of your card easily.
- **Choose Type**: Create horizontal or vertical cards, 1-sided or 2-sided cards.
- **Quick and Easy Design**: Select and draw shapes and text. Resize, tilt, change color, fill with gradient color or pattern or make things partially transparent.
- **Convenient Design tools**: Can draw rectangle/triangle/circle etc. or any freehand lines and shapes.
- **Choose Background**: Use the supplied backgrounds or use your own. Supports any image of type bmp, jpg, gif, png and wmf.
- **Use your own clip-arts, logo and photos**: We supply you with many graphics that you can use, but don't think that it is all you can use. Get your own picture, logos, clip-art and design the perfect card you want.
- **Supports any printing papers**: Supports all standard business card papers from Avery and other suppliers.
- **Save as high resolution image**: You can save your work as bmp, jpg, gif image with resolution up to 600 dpi and take it to your favorite print-shop to have professional printing done.
- **Cut-Copy-Paste**: Offers cut-copy-paste functionality for all the design elements. You can also copy-paste texts and images from other applications.
- **Undo/Redo**: Supports Undo/Redo.

Advanced Features

- **Use Color blends, patterns, transparency**: This is a very unique feature of this software. You can have a color blend the way you want. This is not a static background image, but a filled shape whose color-blend and patterns you control completely. You can also make your objects and images partially transparent to give your card a very sophisticated look. Possibilities are endless!
- **Custom Templates**: You can create your own card template and use it for quick and convenient card creation.
- **Choose any card size**: You can choose any size from 1 X 1 inch to 5 X 5 inch. The choice is yours. The US standard is 3.5 X 2 inch or 2 X 3.5 inch.
- **Customize printing**: You can layout your card printing in your printing paper in a custom matrix of chosen number of row and columns, depending upon your paper size or your requirement.
- **Align/Rotate**: You can align the selected elements to the right, left, top or bottom, or can rotate them to any desired angle.
- **Right clicks and short-cuts**: Business Card Designer Pro is equipped with right-click menus and short-cuts to commonly performed actions for your convenience**.**
